## how FAST CAN YOU STOP

If your safety depended on it, how fast could you stop your car? To bring a moving vehicle to a stop in a split second is a real test of your driving skills. First, your eye must see the danger. Second, your brain must make the "stop" command. Third, your foot must move to the brakes and apply sufficient braking power. This is known as reaction time. The distance your car travels after you apply the brakes is called the "stopping distance." Under perfect driving conditions, it takes an expert almost twice the length of a football field to stop a car traveling 60 miles per hour. At 80 mph, it takes 200 ft. At 100 mph, almost 500 ft. Now add to these distances your own physical and mental condition when your "emergency stop order" comes and you get the whole picture of how fast you can stop. Not too fast, is it?

Whether you're driving on the open highway or in a residential area, proper driving is your responsibility. Obey the law. Drive carefully and join the over 6 million State Farm Mutual policyholders who have found careful driving really pays off through lower accident, lower insurance rates and extra benefits.

## Jim Folsom Retiring From Political Life

This newspaper received a formal statement from former governor, James E. "Big Jim" Folsom, who resides in Cullman, Alabama, which he is making to the people of the State of Alabama. Folsom recently underwent a very serious operation when a blood clot the size of a lemon was removed without injury from the brain.

Folsom, a native of Elba, said in his statement "My doctor has released me for active work. I'm shaky, but thankful for my friends who have realized and overlooked my faults caused by the pressure of some campaign of the distant past." He said, "I can face my family and friends knowing they will understand this handicap of several years." He had reference to the removal of the blood clot.

During this period, Captain Clark participated as a pilot of an army aircraft in at least 25 combat medical evacuation missions over territory infested with

**ELBA NURSING HOME** - Shown is an architect's drawing of the Elba Nursing Home, which is to get under construction in 1965. The Nursing Home is to be connected to the Elba General Hospital, which is seen at the right in the drawing.

The Elba Hospital Association Board is receiving \$290,000.00 in Hill-Burton Funds and an additional \$60,000.00 in State Funds. The \$85,000.00 in local funds will be added to the State and Federal appropriations to construct the 40 bed Elba Nursing Home.

The new facility, second only in importance to the hospital, will provide not only much needed nursing and convalescent care, but when completed, will create approximately 30 to 35 new jobs for the Elba-West Coffee area.

One of the contingencies accompanying the approval of the Elba Nursing Home application was that a contract for construction be let by June of 1965. Thomas Beale, architect, of Mobile, has been instructed to proceed immediately with the necessary drawings and a contract will be let at the earliest possible date.

## IN DEVINE TRAIL Jury Returns Verdict Of First Degree Murder

The jury in the Allen Devine trial in Elba this week reached a verdict of guilty of first degree murder Wednesday afternoon, punishable by death by electric chair. Date of execution has been set for February 18, 1965. The verdict was reached by the jury at 4:26 and they returned to the courtroom at 4:47. In the Allen Devine case, 42, went on trial in Coffee County Circuit Court Monday afternoon charged with first degree murder in the slaying of Elba's assistant police chief, Herman Driggers. Fifteen defense attorneys, including one from the State of Alabama, were on hand for the case Monday afternoon and 12 men had been empaneled by about 6 o'clock. In the qualifying of jury, 25 of the 94 were excused for various reasons. Four were identified as relatives, five as having lived in the area and three as refusing to accept circumstantial evidence for conviction.

The jury began deliberations about noon Wednesday. Devine was indicted by a grand jury on the murder charge after Driggers was killed when he and Deputy Sheriff D. B. Atkinson attempted to serve a peace warrant on Devine at his home here in Elba. As they approached the house several blasts were fired through the front screen door from a 12-gauge automatic shotgun. Driggers was killed instantly by shots which hit him directly in the face. Atkinson was shot three times and was hospitalized in Dothan for several weeks and returned to duty about four weeks ago.

The warrant Driggers and Atkinson were serving was taken out shortly before by Devine's father, D. O. Devine, who charged his son had beaten him. The son was arrested at his home by Sheriff H. D. Tillman a short time after the shooting. Devine pleaded innocent by reason of insanity at his arraignment and the judge ordered a mental examination. Devine was committed to the Alabama State Hospital for the criminally insane.

Defense attorneys, appointed by the courts, pleaded Devine's innocence on the basis of insanity. For the defense, several witnesses, including Devine's father, testified that in their opinion Allen Devine in fact was sane.

The Tiger "B" team, coached by Wendell Hart, also won their first two games. They beat Brundidge 47-19 and Greenville 50-29.

## Government Authorizes School Funds

The amount of payment is determined on the basis of information and estimate contained in the application submitted by the local school board.

The fire was brought under control within a short time after the fire department reached the scene.

## Farm NEWS

History reveals that the nation's first lumberman was none other than Captain John Smith.

Under his direction, a crude sawmill was built at Jamestown, Virginia in 1608 and began turning out Southern Pine boards. Since that time, prices have been up and down hundreds of times.

I. R. Martin, our Auburn University Extension Forester, points out that prices in Alabama will get better. One good thing about lumber is that it is not a perishable commodity. If the price is not right this year, landowners can always wait for better marketing conditions.

G.M. Drewery, our County Forester, reports that last year Coffee County had 100 fires that burned a little over 2,000 acres of land. This reminds me that our timberland is one of our best resources and during the months ahead, we need to prevent fires.

H. D. Barnes of the Mt. Pleasant Community is completing plans to produce hatching eggs for H.J. Harrell in Enterprise. Pleasant County has been interested in growing hatching eggs for broilers. Barnes pointed out that he had been in the building business and farming for several years and that he and his wife wanted something they could do at home.

Some other Mr. Pleasant folks including Frank Britt and Jesse Wakefield have been in the hatching business.

tions makes soil less acid and permits better plant nutrients.

We recommend soil testing whether for crops, gardens, or lawns. The test report will reveal lime and plant nutrient needs.

If uncontrolled, aphids can cause considerable damage to many green vegetables during fall and winter.

Below - freezing temperatures don't bother them either.

Use materials such as malathion, parathion, dibrom, and phosphamidon to control these pests. Be sure to follow directions carefully.

Since feed represents 80 per cent of the cost of producing hogs, a successful hog program requires a carefully planned, efficient feeding program.

**Cotton Allotment**  
**Notices In Mail**

Notices of individual farm acreage allotments for the 1965 upland cotton crop have been mailed to farmers in Coffee County, according to Roy L. Ellis, Chairman, Agricultural Stabilization and Conservation County Committee. The referendum will be held on Tuesday, December 15, 1964.

The Chairman declared that the intention is to let farmers know how the allotment program will affect their farms prior to the December 15 referendum on marketing quotas for the 1965 upland cotton crop. The law requires a favorable vote by at least two-thirds of the growers voting in order to keep marketing quotas in effect.

Growers eligible to vote are all those farmers who engaged in the production of upland cotton in 1964.

If the vote is favorable, Mr. Ellis explained, quotas will apply to the 1965 upland cotton crop, with penalties on any excess cotton produced; price-support loans to growers who do not exceed their farm acreage allotments will be available at a level within the range of from 65 to 90 percent of parity; and additional price support in the form of payments will be made to growers who keep their acreage within the farm's "domestic" allotment.

If the vote is unfavorable, he added, there will be no quotas or penalties on the 1965 upland cotton crop, no price-support loans to growers who do not exceed their farm acreage allotments, and price support will be available at 50 percent of parity.

Coffee County received an allotment of 18,621.0 acres for distribution to growers in producing their 1965 upland cotton crop. This represented the County's share of the national allotment acreage of 16,200,000 acres, including a national reserve of 200,000 acres to take care of minimum farm allotments.

**Cotton Quota**  
**Polling Places**

Set

Polling places where Coffee County farmers may cast ballots in the referendum will be as follows:

Perry's Store, Regular Polling Place, Bower's Store, Newblair, Dyess's Store, Elba Courthouse, Goodman-Pleasant Ridge, Mr. Pleasant, Polling Place, Clintonville Municipal Building, Victoria-Chestnut Grove, Law's Store, Eanon, Kilcrease Store, Zion Chapel, Damascus, Enterprise Courthouse, Winston City Hall, Bryan's Store, New Home Church, Woodland Grove, Polling Place, Fairview.

Issues to be decided in the December 15 referendum are (1) quotas or no quotas, (2) the level of price support to be available for the 1965 upland cotton crop, and (3) whether the domestic allotment program is in effect for upland cotton.

If the vote is favorable, the 1965 crop-with penalties on any excess cotton produced on a farm, price support to growers who do not exceed their farm acreage allotments will be available at a level between 65 and 90 percent of parity, and extra price support in the form of payments may be earned by farmers who keep within the farm's domestic allotment.

at 50 percent of parity, as directed by law.

Growers who have any question about any particular part of the cotton program are urged to get in touch with the ASC County Committee.

**What's Inside?**

WHAT MAGIC INGREDIENTS DO THESE BOTTLES CONTAIN? Do they hold harmful, injurious poisons? Or are they filled with healing medicines and vitamins? Will they inflict pain, or will they cure disease?

But what does it matter? If the contents are bad, we can pour them out.

But the minds of children is an entirely different matter. A small human being can be filled with selfishness and hate, or he can be filled with sincerity and love. Unfortunately, evil is more quickly dispelled from a glass bottle than from the soul of a child. For in the human mind bad thoughts can grow, and as time goes on, it is more difficult to replace them with truth and love.

That is why it is so important to instill within our children a sense of right and wrong at an early age. Of course, by example, "you" can be a tremendous influence. But you need the help of your church—the wisdom of Christ's teachings. With them, you can fill your heart with the essential ingredients for a happy and fruitful life.

Every mission he flew was in accordance with the best tradition of the service. By this outstanding degree of professionalism and strict attention today, Captain Clark has brought great credit upon himself, his unit and the United States Army.

Captain Clark is 27 years of age. His wife, Huey, and daughter, Tara, and son, Kevin, are residing at Anniston, Alabama. He has a sister, Miss Nancy Clark, who resides at the home in Elba.

Captain Clark is attached to the 82nd Medical Detachment of the United States Army. He joined the Army in August 1960 and is making it a career. He is a graduate of Elba High School, graduating in 1956. He attended Marion Institute two years, graduating in 1958 and attended Jackson State Teacher's College for two years.

Folsom said he was determined to have this pressure located before he died, that he had the best doctors and hospital in the world and that "I had little enough sense to actively support voter rights, civil rights, the Bill of Rights and state rights all my political life." He concluded his statement with "That the approaching Christmas season dawn on an Alabama Democracy

that has never been witnessed by living man. I'll take an active interest in politics, but I'll never again be a candidate." His final remark in his formal statement was "I just thank God that we have younger leaders coming up who believe in principle before profit."

Refreshments and a social hour were enjoyed at the conclusion of the Court. Members of Elba Scout Troop 37, sponsored by the Elba Lions Club, participating in the "Court of Honor" were: Charles Crosby, Al Davis, Neal Davis, Gene Dorsey, Steve Dorsey, Marcus DuBose, Mike DuBose, Wade Parry, Buddy Foreman, Dan Hamm, Mike Hamm, Jack Hudson, Jerry Nelson, Daniel Stephens, Lewey Stephens, Ray Trammell, Jr., and Mike Williams.

Garth Lindsey, special prosecutor, and Circuit Solicitor Lewey Stephens sought the death penalty on the basis of testimony by Coffee County Sheriff H. D.
